

Can I use a Quooker tap with a water softener?

Fact checker

Quooker and TwinTec Water Softeners – flawless teamwork for perfect boiling water.

Quooker boiling water taps are so versatile in the kitchen, it's good to know that they can be teamed easily with TwinTec Water Softeners.

Softened water is completely compatible with a Quooker boiling water tap providing the water softener is correctly fitted, the **water pressure is maintained at above 2b** and that the water delivered has a **pH value of between +6.5 and +7.5**.

When installing your Quooker, the dedicated Quooker engineer will check your water pressure and pH to ensure it meets with these requirements.

Not all water softeners are as compatible with the Quooker system, but Quooker is happy and confident to install a Quooker tap with a TwinTec Water Softener. Both Quooker and TwinTec are high quality, tried and tested brands which work extremely well together, providing you with years of dependable service.
